

for doors and gates

up your entrances during the night, independently from the gate opening.

motors while functioning. This provides a comfortable courtesy light during night hours, thanks to a twilight

and economic way.

and outdoor led lighting

PERFORMANCE | designed and manufactured in compliance with the requirements of the EU standards and Italian quality
Efficient and reliable, tested for wear resistance and long durability for both mechanical and electronic components. Simple to install, easy to use and, above all, safe for the whole family

SAVING | the use of LEDs allows lower power consumption compared to the use of traditional incandescent bulbs providing a longer life cycle and a brighter vision
The cost of the Night Light System energy consumption referred to the lights at night is about 2 Euros per year*

* Night Light System: example of automation for swing gates (Ray, Révo), with three courtesy lights at medium-high power, continuously lit for 12 hours a day, every day of the year, at a cost of energy equal to 0.21 Euros/kWh (average price for residential use)

Night Light System

UNDER A NEW LIGHT | A new way of conceiving the automation

Night Light System is an automation system with leds built into the motor housing and in the flashing light, to light

The innovative Night Light System is based on the integration of LED units within the automation, to light up the sensor placed into the flash light itself. Our motors become a stylish light source for your gate.

The new product line Key Garden has been conceived to illuminate residential and industrial areas in a simple, safe

- COMFORT** | defines the width of the driveway passage during the night hours, simplifying the entrance and exit from the house
- DESIGN** | represents the Italian style and design, combining elegance and technology with the use of last generation materials and LEDs lighting. Enhances the beauty of the gate design, thanks to the smooth and sinuous shapes, giving a more sophisticated aspect to your environment
- SAFETY** | ease the night vision when security cameras are installed, in order to monitor the perimeter of the house and obtain a better control on your private property

automation for gates, doors

THE SIMPLICITY OF A NIGHT LIGHT SYSTEM INSTALLATION

1 connect the led flash light ECLIPSE (4 wires) or the twilight sensor QUADRO (2 wires) to the white terminal on the control unit 14A: the system will automatically work without any kind of additional adjustments

2 connect in parallel to the white terminal of the control unit all the garden lights you want (24v) up to 20 lights. Program the remote controls in pre-set mode into the receiver

3 DONE!

+ without the need of additional adjustment the system will work automatically

courtesy lights of motors and all the garden lights connected will turn on automatically at twilight and will turn off at sunrise

a button in the transmitter is dedicated to the possible remote switching on and off of lights; by keeping pressed the button you can dim lights as per your preference

the yearly consumption of led lights is about 2 Euros for each light turned on all night long throughout the year

at the price of an automation for gates you find all included the necessary to make a complete automatic garden led light management
