Key Automation News 12.2017

KUBE PRO & KUBE - Key Automation App

FOR THE INSTALLER

Not just smartphone programming, but much more... **KUBE PRO** will revolutionize your work:

- Store your customer portfolio and all systems on your phone: you can always have data at hand, generate statistics and much more
- Perform automation programming and all functions without the need of the instruction manual very easily. Connect the KUBE to the 14A control panel and when the programming is over, take it with you

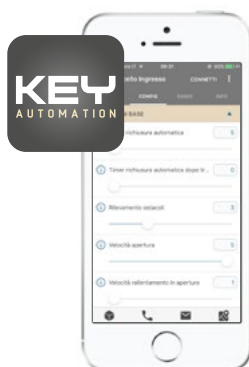

- Manage remote controls in the system via your smartphone
- Through the web portal you can manage the ordinary or extraordinary maintenance of all your customers
- If the end user purchases the KUBE module you can check through his app the cause of a problem or change a parameter before going onsite to the installation
- Create a work team by collecting data from your employees' installations

HOW DOES IT WORK?
